Danipa Financial Technology Platform – Executive Summary

Who We Are

Danipa Business Systems Inc. (founded 2006) is transitioning from an IT consulting and web services firm into a focused Financial Technology company. Our new brand identity centers on the Danipa Financial Technology Platform: a secure, cloud-native payment infrastructure designed to power remittances and collections across Africa.

Vision

To provide secure, enterprise-grade financial technology services that enable inclusive access to payments, digital wallets, and remittances for millions across Africa.

Platform Highlights

1   Enterprise-grade technologies: Spring Boot 3, Redis, Kafka, Vault, Eureka.

2   Supports MTN MoMo integration with future expansion to PayPal, Stripe, and other providers.

3   Cloud-native, scalable, and containerized via Docker and Azure Container Apps.

4   Developer-first approach: API documentation, Swagger UI, runbooks, and SDKs.

Transition Roadmap

1   2024: Consulting foundation & legacy site.

2   2025: Platform stack, MoMo integration, rebranding & website relaunch.

3   2026: Expand to additional payment providers.

4   2027+: Scale across Africa to drive financial inclusion.

Next Steps

1   Launch redesigned Danipa.com focused on fintech.

2   Establish developer portal (dev.danipa.com) with Swagger APIs.

3   Refresh brand identity and visuals.

4   Engage stakeholders, partners, and pilot customers.
